

Amendments to the Claims

This listing of claims will replace all prior versions of claims in the application:

Listing of Claims

1. (Currently amended) An interactive television program guide system comprising:

a plurality of user television equipment devices ~~interconnected by communications paths and~~ located in a household in a peer-to-peer arrangement and on at least two of which ~~devices~~ interactive television program guides are implemented;

means associated with at least one of said interactive television program guides for adjusting interactive television program guide settings; and

means for coordinating the operation of said interactive television program guides so that the program guide settings that are adjusted using said means for adjusting are effective on at least one of the interactive television program guides other than the interactive television program guide implemented on the television equipment device with which the means for adjusting is associated.

2. (Original) The interactive television program guide system defined in claim 1 further comprising means for selecting the interactive television program guides on which the adjusted program guide settings will be effective.

3. (Original) The interactive television program guide system defined in claim 2 wherein said means for selecting uses input from a user.

4. (Original) The interactive television program guide system defined in claim 2 wherein said means for selecting uses a default location.

5. (Previously presented) The interactive television program guide system defined in claim 2 wherein said means for selecting uses factors other than by default to determine the location.

6. (Original) The interactive television program guide system defined in claim 1 wherein at least one of the user television equipment devices comprises a set-top box.

7. (Original) The interactive television program guide system defined in claim 1 wherein the means for adjusting permits adjusting parental control settings.

8. (Previously presented) The interactive television program guide system defined in claim 1 wherein the means for adjusting permits adjusting favorites settings.

9. (Original) The interactive television program guide system defined in claim 1 wherein the means for adjusting permits adjusting profiles.

10. (Previously presented) The interactive television program guide system defined in claim 1 wherein the means for adjusting permits adjusting recording settings.

11. (Previously presented) The interactive television program guide system defined in claim 1 wherein the means for adjusting permits adjusting pay-per-view settings.

12. (Original) The interactive television program guide system defined in claim 1 wherein the means for adjusting permits adjusting messages settings.

13. (Previously presented) The interactive television program guide system defined in claim 1 wherein the means for adjusting permits adjusting set-up settings.

14. (Original) The interactive television program guide system defined in claim 1 wherein one of the user

television equipment devices is a primary user television equipment device and the other user television equipment devices are secondary user television equipment devices.

15. (Original) The interactive television program guide system defined in claim 14 wherein the communications paths are configured to connect each one of the secondary user television equipment devices to the primary user television equipment device.

16. (Original) The interactive television program guide system defined in claim 1 wherein the communications paths are configured to connect the user television equipment devices in a tree topology.

17. (Original) The interactive television program guide system defined in claim 1 wherein the communications paths are configured to connect the user television equipment devices in a ring topology.

18. (Original) The interactive television program guide system defined in claim 1 wherein the communications paths are configured to connect the user television equipment devices in a bus topology.

19-22. (Canceled)

23. (Original) The interactive television program guide system defined in claim 1 further comprising means for providing an assign location screen to the user.

24. (Original) The interactive television program guide system defined in claim 1 wherein the household comprises a home with multiple rooms at least two of which each contain one of the user television equipment devices on which one of the interactive television program guides is implemented, the system further comprising means for selecting the interactive television program guides on which the adjusted program guide settings are to be effective by selecting certain rooms.

25. (Original) The interactive television program guide system defined in claim 1 further comprising means for allowing the user to monitor the television viewing of users at interactive television program guides other than the interactive television program guide on the user television equipment with which the means for adjusting is associated.

26. (Original) The interactive television program guide system defined in claim 1 wherein the means for adjusting permits adjusting maximum rating allowed settings.

27. (Original) The interactive television program guide system defined in claim 1 wherein the means for adjusting permits adjusting pay per view settings;

further comprising means for displaying information to the user on the interactive television program guide on the user television equipment device associated with the means for adjusting is implemented regarding a cost associated with each extra program guide location within the household that is authorized to view the pay-per-view television program purchased by the user.

28. (Original) The interactive television program guide system defined in claim 1 further comprising:

means for sending messages to viewers at interactive television program guides other than the interactive television program guide on the user television equipment with which the means for adjusting is associated.

29. (Original) The interactive television program guide system defined in claim 1 wherein the means for adjusting permits adjusting the channel setting at a remote location.

30. (Previously presented) The interactive television program guide system defined in claim 25 further

comprising means for disallowing monitoring of a selected location.

31. (Currently amended) An interactive television program guide system comprising:

a plurality of user television equipment devices ~~interconnected by communications paths~~ and located in a household in a peer-to-peer arrangement and on at least two of which ~~devices~~ interactive television program guides are implemented;

at least one of said interactive television program guides configured to adjust interactive television program guide settings; and

at least one of said interactive television program guides configured to coordinate the operation of said interactive television program guides so that program guide settings adjusted by at least [[one of]] one of said guides configured to adjust program settings are effective on at least one of the interactive television program guides other than the interactive television program guide implemented on the television equipment device configured to adjust program guide settings.

32. (Currently amended) The interactive television program guide system defined in claim 31 wherein at least

[[one of]] one of said guides is configured to allow the selection of the interactive television program guides on which the adjusted program guide settings will be effective.

33. (Original) The interactive television program guide system defined in claim 32 wherein settings are effective on an interactive television program guide selected by a user.

34. (Original) The interactive television program guide system defined in claim 32 wherein settings are effective on an interactive television program guide selected by default.

35. (Previously presented) The interactive television program guide system defined in claim 32 wherein settings are effective on an interactive television program ~~guides~~ guide selected based on factors other than by default.

36. (Original) The interactive television program guide system defined in claim 32 wherein at least one of the user television equipment devices comprises a set-top box.

37. (Original) The interactive television program guide system defined in claim 31 wherein the settings adjusted include parental control settings.

38. (Previously presented) The interactive television program guide system defined in claim 31 wherein the settings adjusted include favorites settings.

39. (Previously presented) The interactive television program guide system defined in claim 31 wherein the settings adjusted include recording settings.

40. (Previously presented) The interactive television program guide system defined in claim 31 wherein the settings adjusted include pay-per-view settings.

41. (Original) The interactive television program guide system defined in claim 31 wherein the settings adjusted include messages settings.

42. (Previously presented) The interactive television program guide system defined in claim 31 wherein the settings adjusted include set-up settings.

43. (Original) The interactive television program guide system defined in claim 31 wherein one of the user television equipment devices is a primary user television equipment device and the other user television equipment devices are secondary user television equipment devices.

44. (Original) The interactive television program guide system defined in claim 31 wherein the communications paths are configured to connect each one of the secondary user television equipment devices to the primary user television equipment device.

45. (Original) The interactive television program guide system defined in claim 31 wherein the communications paths are configured to connect the user television equipment devices in a tree topology.

46. (Original) The interactive television program guide system defined in claim 31 wherein the communications paths are configured to connect the user television equipment devices in a ring topology.

47. (Original) The interactive television program guide system defined in claim 31 wherein the communications paths are configured to connect the user television equipment devices in a bus topology.

48-51. (Canceled)

52. (Original) The interactive television program guide system defined in claim 31 further comprising an assign location screen.

53. (Original) The interactive television program guide system defined in claim 31 wherein the household comprises a home with multiple rooms at least two of which each contain one of the user television equipment devices on which one of the interactive television program guides is implemented, the system further comprising at least one of said interactive television program guides configured to select the interactive television program guides on which the adjusted program guide settings are to be effective by selecting certain rooms.

54. (Original) The interactive television program guide system defined in claim 31 further comprising at least one of said interactive television program guides configured to allow the user to monitor the television viewing of users at interactive television program guides other than the interactive television program guide configured to allow the user to monitor the television viewing of users.

55. (Original) The interactive television program guide system defined in claim 31 wherein the settings adjusted include maximum rating allowed settings.

56. (Original) The interactive television program guide system defined in claim 31 wherein the settings adjusted include pay per view settings;

further comprising at least one of said interactive television program guides configured to display information to the user on the user television equipment device on which the interactive television program guide configured to adjust settings is implemented regarding a cost associated with each extra program guide location within the household that is authorized to view the pay-per-view television program purchased by the user.

57. (Original) The interactive television program guide system defined in claim 31 further comprising:

at least one of said interactive television program guides configured to send messages to viewers at interactive television program guides other than the interactive television program guide configured to adjust settings is implemented.

58. (Original) The interactive television program guide system defined in claim 31 wherein the settings adjusted include the channel setting.

59. (Previously presented) The interactive television program guide system defined in claim 54 further comprising:

at least one of said interactive television program guides configured to disallow the ability to monitor

the television viewing of users at specified interactive television program guides other than the interactive television program guide configured to allow the user to monitor the television viewing of users.

60. (Currently amended) A method for using an interactive television program guide system in which a plurality of user television equipment devices ~~interconnected by communications paths and~~ located in a household in a peer-to-peer arrangement and on at least two of which ~~devices~~ interactive television program guides are implemented, the method comprising;

adjusting interactive television program guide settings with at least one of the interactive television program guides; and

coordinating the operation of said interactive television program guides so that program guide settings adjusted by at least one of said interactive television program guides are effective on at least one of the interactive television program guides other than the interactive television program guide implemented on the television equipment device used to adjust program guide settings.

61. (Original) The method of claim 60 further comprising selecting the interactive television program guides on which the adjusted program guide settings will be effective.

62. (Previously presented) The method of claim 61 wherein a user selects the interactive television program guides on which the adjusted program guide settings will be effective.

63. (Previously presented) The method of claim 61 wherein a system default selects the interactive television program guides on which the adjusted program guide settings will be effective.

64. (Previously presented) The method of claim 61 wherein factors other than by default are used to select the interactive television program guides on which the adjusted program guide settings will be effective

65. (Original) The method of claim 60 wherein at least one of the user television equipment devices comprises a set-top box.

66. (Original) The method of claim 60 wherein the settings adjusted include parental control settings.

67. (Previously presented) The method of claim 60 wherein the settings adjusted include favorites settings.

68. (Previously presented) The method of claim 60 wherein the settings adjusted include recording settings.

69. (Previously presented) The method of claim 60 wherein the settings adjusted include pay-per-view settings.

70. (Original) The method of claim 60 wherein the settings adjusted include messages settings.

71. (Previously presented) The method of claim 60 wherein the settings adjusted include set-up settings.

72. (Original) The method of claim 60 wherein one of the user television equipment devices is a primary user television equipment device and the other user television equipment devices are secondary user television equipment devices.

73. (Original) The method of claim 60 wherein the communications paths are configured to connect each one of the secondary user television equipment devices to the primary user television equipment device.

74. (Original) The method of claim 60 wherein the communications paths are configured to connect the user television equipment devices in a tree topology.

75. (Original) The method of claim 60 wherein the communications paths are configured to connect the user television equipment devices in a ring topology.

76. (Original) The method of claim 60 wherein the communications paths are configured to connect the user television equipment devices in a bus topology.

77-80. (Canceled)

81. (Previously presented) The method of claim 60 further comprising viewing an assign location screen.

82. (Original) The method of claim 60 wherein the household comprises a home with multiple rooms at least two of which each contain one of the user television equipment devices on which one of the interactive television program guides is implemented, the method further comprising selecting the interactive television program guides on which the adjusted program guide settings are to be effective by selecting certain rooms.

83. (Original) The method of claim 60 further comprising monitoring the television viewing of users at interactive television program guides other than the interactive television program guide on the user television equipment used to adjust settings.

84. (Original) The method of claim 60 wherein the settings adjusted include maximum rating allowed settings.

85. (Original) The method of claim 60 wherein the settings adjusted include pay per view settings;

further comprising display information to the user on the user television equipment device on which the interactive television program guide used to adjust settings is implemented regarding a cost associated with each extra program guide location within the household that is authorized to view the pay-per-view television program purchased by the user.

86. (Original) The method of claim 60 further comprising:

sending messages to viewers at interactive television program guides other than the interactive television program guide on the user television equipment used to adjust settings.

87. (Original) The method of claim 60 further comprising adjusting the channel setting at a remote location.

88. (Previously presented) The method of claim 83 further comprising disallowing monitoring of a selected location.

89. (Currently amended) A system comprising:
a plurality of user television equipment devices ~~interconnected by communications paths and~~ located in a household in a peer-to-peer arrangement, wherein the user television equipment devices include set-top boxes and wherein an application is implemented on each set-top box;
means for providing an opportunity for a user to adjust settings associated with a given one of the applications implemented on a given one of the set-top boxes;
and
means for coordinating the operation of the applications so that the settings of the given application implemented on the given set-top box that are adjusted are used by at least one of the other applications implemented on another one of the set-top boxes.

90. (Currently amended) A system comprising:

a plurality of user television equipment devices ~~interconnected by communications paths and~~ located in a household in a peer-to-peer arrangement, wherein the user television equipment devices include set-top boxes, wherein an application is implemented on each set-top box, and wherein the user television equipment devices are configured to allow a user to adjust settings associated with a given one of the applications implemented on a given one of the set-top boxes, and are configured to coordinate the operation of the applications so that the settings of the given application implemented on the given set-top box that are adjusted are used by at least one of the other applications implemented on another one of the set-top boxes.

91. (Currently amended) A method for using a system in which a plurality of user television equipment devices are ~~interconnected by communications paths and~~ located in a household in a peer-to-peer arrangement, wherein the user television equipment devices include set-top boxes, and wherein an application is implemented on each set-top box, comprising:

providing an opportunity for a user to adjust settings associated with a given one of the applications implemented on a given one of the set-top boxes; and

coordinating the operation of the applications so that the settings of the given application implemented on the given one of the set-top boxes that are adjusted are used by at least one of the other applications on another one of the set-top boxes.

92. (Currently amended) An interactive television program guide system based on multiple user television equipment devices in a single household, comprising:

a plurality of user television equipment devices ~~interconnected by communications paths and~~ located in a single household in a peer-to-peer arrangement and on which a plurality of interactive television program guides are implemented;

means for providing an opportunity for a user at a given one of the plurality of interactive television program guides to adjust program guide settings with the given one of the plurality of interactive television program guides; and

means for coordinating the operation of the plurality of interactive television program guides so that the program guide settings that are adjusted with the given one of the plurality of interactive television program guides are used by at least another one of the plurality of

interactive television program guides during operation of the plurality of interactive program guides.

93. (Currently amended) An interactive television program guide system based on multiple user television equipment devices in a single household, comprising:

a plurality of user television equipment devices ~~interconnected by communications paths and~~ located in a single household in a peer-to-peer arrangement and on which a plurality of interactive television program guides are implemented, wherein the plurality of user television equipment devices are configured to:

provide an opportunity for a user to adjust program guide settings with a given one of the plurality of interactive television program guides; and

coordinate the operation of the plurality of interactive television program guides so that the program guide settings that are adjusted with the given one of the plurality of interactive television program guides are used by at least another one of the plurality of interactive television program guides during operation of the plurality of interactive program guides.

94. (Currently amended) A method for using an interactive television program guide system based on multiple

user television equipment devices in a single household, wherein the system has a plurality of user television equipment devices on which interactive television program guides are implemented and wherein the user television equipment devices are ~~interconnected by communications paths~~ and located in a single household in a peer-to-peer arrangement, comprising:

providing an opportunity for a user at a given one of the plurality of interactive television program guides to adjust program guide settings with that given one of the plurality of interactive television program guides; and

coordinating the operation of said plurality of interactive television program guides so that the program guide settings that are adjusted with the given one of the plurality of interactive television program guides are used by at least another one of the plurality of interactive television program guides during operation of the plurality of interactive program guides.

95. (Canceled)

96. (Previously presented) The interactive television program guide system defined in claim 1 wherein:
the program guide settings include pay-per-view settings;

a first one of the plurality of user television equipment devices is authorized to allow viewing of a pay-per-view program;

a least one additional one of the plurality of user television equipment devices is authorized to allow viewing of the pay-per-view program;

a first cost is associated with viewing the pay-per-view program at the first one of the plurality of user television equipment devices;

an additional cost is associated with viewing the pay-per-view program at each additional one of the plurality of user television equipment devices; and

at least one of the at least one interactive television program guides associated with the means for adjusting is configured to provide information about the first cost and each additional cost.

97. (Canceled)

98. (Previously presented) The interactive television program guide system defined in claim 31 wherein:

the program guide settings include pay-per-view settings;

a first one of the plurality of user television equipment devices is authorized to allow viewing of a pay-per-view program;

at least one additional one of the plurality of user television equipment devices is authorized to allow viewing of the pay-per-view program;

a first cost is associated with viewing the pay-per-view program at the first one of the plurality of user television equipment devices;

an additional cost is associated with viewing the pay-per-view program at each additional one of the plurality of user television equipment devices; and

at least one of the at least one of said interactive television guides configured to adjust is further configured to provide information about the first cost and each additional cost.

99. (Canceled)

100. (Previously presented) The method of claim 60 wherein:

the program guide settings include pay-per-view settings;

a first one of the plurality of user television equipment devices is authorized to allow viewing of a pay-per-view program;

at least one additional one of the plurality of user television equipment devices is authorized to allow viewing of the pay-per-view program;

a first cost is associated with viewing the pay-per-view program at the first one of the plurality of user television equipment devices;

an additional cost is associated with viewing the pay-per-view program at each additional one of the plurality of user television equipment devices; and

at least one of the at least one of interactive television guides with which settings are adjusted is configured to provide information about the first cost and each additional cost.
